FOREWORDS

Anabela Isidro & Hugo Soares

ECHoS Coordinators

As Coordinators of ECHoS it is a great honour to lead a consortium that includes such a prestigious group of organisations, 57(!) from 25 Member States, 3 Associated Countries, and a transnational European Organisation, with the common goal of supporting the implementation of EU Mission on Cancer.

By establishing National Cancer Mission Hubs (NCMHs) in each MS/AC, European citizens and organizations in health, research and beyond will be voiced and their voices will echo together. In the next three years, we, together with partners all over Europe, will advocate for the implementation of the objectives of the Cancer Mission at National, Regional, and Local levels - altogether contributing to improving the lives of 3 million people by 2030.

It is therefore with the highest sense of responsibility that we commit ourselves to create the foundations on NCMHs in each MS/AC and capacitate each one, through knowledge sharing and networking, to create real life impact in cancer care and research. Breaking Through Cancer.

I welcome this important initiative of the Cancer Mission. The future National Cancer Mission Hubs will enhance Member States' capacities to integrate EU cancer research and policy actions at national, regional, and local levels. By supporting cross-policy dialogues with stakeholders, these hubs will create a seamless link between R&I and policy developments. This is great news for EU citizens, who will be the key focus of the Mission Hubs' activities.

Mariya Gabriel

European Commissioner for Innovation, Research, Culture, Education and Youth

ECHoS will facilitate and accelerate integration of Cancer Mission activities at the national and regional level. It will provide them with the capacity to gradually create permanent structures dedicated to the integration of the Cancer Mission, providing guidelines and best practices for efficient stakeholder mobilisation and participation taking into consideration the differences in national health and research systems. The future network of mission hubs will serve as a platform for national and regional actors across the EU, for best practices exchanges and joint activities.

Joanna Drake
Deputy Director-General for Research and Innovation

Ioannis Vouldis

European Health and Digital Executive
Agency (HaDEA) - EC

EU Missions are a novelty of the Horizon Europe research and innovation programme, aiming to address some of the greatest challenges in our society. The goal of the Mission on Cancer is to improve the lives of more than 3 million people by 2030, through prevention, cure and support a better and longer life for those affected by cancer including their families.

In this context, the ECHoS project 'Establishing of Cancer Mission Hubs: Networks and Synergies' is granted 6 million euros funding to support the implementation of the Cancer Mission activities in the EU Member States and Associated Countries through the establishment and development of Cancer Mission Hubs operating at national, regional and local levels.

As the responsible EU Officer for ECHoS, I feel privileged working together with the ECHoS coordination team, their partners and stakeholders, to help meeting the project objectives and yield fruitful results. And in doing so, contributing to the Cancer Mission being delivered, thus helping people to lead healthier lives in Europe and beyond.

OVERVIEW

INTRODUCTION

Cancer is a major and growing societal challenge. The increasing incidence of cancer and the introduction of expensive innovative diagnostics, therapeutics, and care interventions makes it an everyday growing economic burden to European healthcare systems. To face this reality, the **European Commission** has set ambitious and innovative collaborative efforts, as part of the **European Beating Cancer Plan (EBCP)** and of **Horizon Europe (HE)**, to integrate cancer control measures based on the outputs of fundamental, translational, and clinical research. Alongside this, the EU has invested in several innovation measures to foster R&I in the private sector, as well as to enable greater citizen participation, together with policy, and legislation support. While the organization of cancer awareness and control initiatives at various levels is laudable, there is a potential concern that a disconnected approach may dilute efforts and bring confusion to citizens, in addition to researchers and healthcare professionals.

Through **Cancer Mission**, EC appeals Member States and Associated Countries (MS/AC) to **combine research, innovation, and policy development**, in ways that cannot be achieved through individual and fragmented initiatives. The ambition of **ECHoS** is to further support the Cancer Mission by providing MS/AC with the capacity to gradually create **National Cancer Mission Hubs (NCMHs)** operating at national, regional and, where relevant, local levels. These NCMHs will have a **key role in involving all relevant national, regional, and local stakeholders, including citizens, in cancer-related policy dialogues.**

Aligned with the ambition of EU Mission Cancer, the driving force of ECHoS project is **"To improve the lives of more than 3 million people by 2030 through prevention, cure and for those affected by cancer including their families, to live longer and better"**.

IN 2020¹ ...

...2.7 million people in the EU-27 were diagnosed with cancer...

... and 1.3 million die from the disease.

1. ECIS - European Cancer Information System, available at <https://ecis.jrc.ec.europa.eu/>

OBJECTIVES

The primary aim of ECHoS is to support the implementation of the Cancer Mission activities in all Member States and Associated Countries through the establishment and **development of Cancer Mission Hubs** operating at national, regional and local levels. ECHoS will set the foundations for the creation of a future European Network of National Cancer Mission Hubs (EU network of NCMHs) with the ambition to be a **strong and cohesive network**, aligned with the Cancer Mission and EBCP, that will continue fostering collaborative research, as well as citizen and other stakeholder engagement efforts. ECHoS will engage with stakeholders across the entire cancer landscape, from individual citizens to European Institutions, as well as national authorities, regulators, industry, patient organizations, and academia. ECHoS broad scope aims to **take cancer-policy dialogues beyond research and innovation and health systems covering also other relevant areas in cancer control and support such as employment, education, and socio-economic aspects**. To guarantee alignment and progress in the field of cancer, ECHoS will be guided by impacting subareas of Cancer Mission - namely **prevention, early detection and treatment, quality of Life and survivorship** - as well as equity, sustainability, and cross-cutting EU priorities such as social engagement and digital health.

Our aim is to **support the implementation of the Cancer Mission activities in all MS/AC...**

...through the establishment and development of National Cancer Mission Hubs.

To promote the creation of National Cancer Mission Hubs in MS/AC

To establish a network of support to advance Cancer Mission across Europe

To create synergies for the implementation of the Cancer Mission with other European initiatives towards a "Cancer in All" approach

To create the foundations for a European network of NCMHs by developing a business continuity and operations model framework.

NETWORKS & SYNERGIES

STRUCTURE

All partners have **key roles** in their respective countries: in cancer care, research, as well as research and health policies. These partners include **citizens, industry, SMEs, academia, governance, hospitals and infrastructures**. Many are involved in community engagement activities and/or defining cancer-control strategies. Together, they form a **strong pool of knowledge and expertise** to reach General and Specific project objectives.

WP1

WORK PACKAGES

A decorative graphic consisting of a horizontal row of overlapping circles. The circles are white with a dark green outline, and they overlap in a way that creates a continuous, wavy pattern.

WP1 | Project Governance and Implementation

Led by AICIB, WP1 will be dedicated to all the **management procedures for the day-to-day operations of the project**. These include the coordination of project activities, support to WPs, preparing for project meetings, and delivery of periodic reports to the EC. This WP will also monitor the implementation NCMHs across participating MS/AC and their activities as a measure of impact of the project.

TASKS:

Task 1.1 | Project Coordination and Project Management (AICIB, PT)

Task 1.2 | Project Governance and support to Governance structure (AICIB, PT)

Task 1.3 | Monitoring and Evaluation of Project Implementation (Tecnalia, ES)

THE OBJECTIVE OF WP1 IS TO ENSURE AN EFFICIENT COORDINATION AND MANAGEMENT OF THE ECHOS PROJECT BY:

- **Operational level**, manage the progress of project activities according to the timely fulfilment of the milestones and deliverables within the planned resources.
- **Strategic level**, make necessary adjustments to technological, scientific, economical, or legal aspects, if needed, to guarantee the course set out in the description of work.
- **Institutional level**, manage the consortium's relationship with the European Commission by ensuring that all the required documentation will be delivered according to the applicable rules and procedures.
- **Consortium level**, ensure a regular and up-to-date flow of relevant information among all partners.
- **Outcome level assess**, the impact and performance through monitoring of project results.
- **Ethical and legal level**, to ensure that all relevant ethical standards and guidelines.

WP2 | National Cancer Mission HUBs design, creation and Knowledge Exchange

Led by INT, WP2 will be dedicated to the **definition of the basis, general design and the operative NCMH structural elements**. These are envisaged as new conceptual initiatives that aim to break silos in health care, research, and innovation: creating bridges within and beyond this triangle in the cancer area. Guidelines, best practices, capacity building in knowledge exchange programs and awareness events will serve to promote NCMHs establishment.

TASKS:

Task 2.1 | Definition of general design and operative NCMH structural elements (INT, IT)

Task 2.2 | Guidelines and best practices for the implementation of NCMHs (NIO-PIB, PL)

Task 2.3 | Capacity Building: Knowledge exchange program (Sciensano, BE, and InoMed, RO)

Task 2.4 | Support the development of NCMHs awareness events in MS/AC (AICIB, PT)

THE OBJECTIVE OF WP2 IS TO DEFINE THE GROUNDS AND PROMOTE NATIONAL CANCER MISSION HUBS ESTABLISHMENT BY:

- **Generating concept models of NCMHs**, aligned with the Cancer Mission Implementation Plan, including the definition of minimal criteria for inclusion.
- **Mapping and categorization** of structures hubs, agencies, mirror groups, informal groups, initiatives operating in MS/AC participating in ECHoS.
- **Creating a manual with guidelines**, best practice, real-world inspirational examples, and a set of recommendations for the creation of NCMHs.
- **Developing an internal knowledge sharing program** stimulating sharing of best practices and mutual learning among organizations.
- **Supporting the development of meetings and events** to raise awareness for NCMHs in MS/AC.

WP3 | Multi-stakeholder identification, engagement and cooperation

Coordinated by Center for Innovation in Medicine (InoMed, Romania), WP3 will be dedicated to **helping NCMHs identify, engage, connect, and enable traditional and non-traditional organized stakeholders** to actively and impactfully contribute to the success of the Cancer Mission.

TASKS:

Task 3.1 | Establish impact models to support implementation of Mission on Cancer (SIR, SE)

Task 3.2 | Identify stakeholders and create an interactive tool for stakeholder interactions at MS/AC, Regional and local level (HUS, FI)

Task 3.3 | Engage individual stakeholders and foster cooperation (OCC, NO)

THE OBJECTIVE OF WP3 IS TO ESTABLISH CONNECTIONS AND ENGAGE STAKEHOLDERS TO CONTRIBUTE TO THE SUCCESS OF CANCER MISSION:

- **Develop suitable impact models** for the Cancer Mission subareas that will contribute to the overall success of the Cancer Mission, by providing NCMHs with a blueprint to adapt to national context and priorities, allow them to rapidly engage relevant stakeholders and identify critical activities and necessary milestones.
- Based on impact models, **systematically engage relevant stakeholder groups**, and stimulate bottom-up cancer-mission activities,
- **Foster multi-stakeholder co-operation** by building a shared culture around Cancer Mission.
- **Establish an interactive tool** to map stakeholders across all groups in a way that enables new connections, and to encourage Mission activities among different stakeholders.

WP4 | Synergies: bridges to Missions and other European initiatives

Led by Council for Science and Technology (MCST, Malta), WP4 will be dedicated to **investing in the generation of collaborations with European Projects and organizations in Health, Research and Beyond**. WP4 will initiate and strengthen synergies between ECHoS (and NCMHS) with other European bodies, initiatives and actors to ensure that there is an effective policy dialogue at all levels and to allow an effective connection with such initiatives.

TASKS:

Task 4.1 | Creation of a Liaison Committee for high-level representation and Policy dialogues (AICIB, PT)

Task 4.2 | Operational level synergies with EU initiatives (EKT, GR & UCSC, IT)

Task 4.3 | 'Cancer in all policies'- synergies beyond Health (MCST, MT)

THE OBJECTIVE OF WP4 IS TO INITIATE AND STRENGTHEN SYNERGIES BETWEEN ECHOS (AND NCMHS) WITH OTHER EUROPEAN BODIES, INITIATIVES AND ACTORS:

- **Ensure broad (European, national, regional, local) involvement** of actors in the cancer policy dialogue, particularly with EU Institutions, National Authorities, Cancer Mission amongst others.
- **Ensure broad stakeholders' involvement**, including patients and citizens, in policy dialogue on cancer.
- **Identify potential synergies with other areas** to contribute to the success of the Mission.

WP5 | Future EU network of National Cancer Mission HUBs – Design Study

Coordinated by Sciensano (Belgium), WP5 will be dedicated to developing a sustainable business continuity model to the future network of NCMHs. WP5 will **build on the outcomes and outputs of WP2 and its potential adaptations to different national contexts**. Adjustments are envisioned according to the needs identified in WP3, WP4, and WP6 in respect to interaction with organized stakeholders, synergies with other European initiatives, and individual citizens, respectively.

TASKS:

Task 5.1 | Define scope of the EU network of National Cancer Mission Hubs (Sciensano, BE)

Task 5.2 | Business-continuity framework – governance, finance and business models (NIO-PIB, PL)

Task 5.3 | Strategic roadmap for a sustainable European Network of Cancer Mission Hubs (AICIB, PT)

THE OBJECTIVE OF WP5 IS TO BUILD AN OPERATIONAL BLUEPRINT OF THE FUTURE EU STRUCTURE THAT WILL CONNECT NCMHS TRANSNATIONALLY:

- **Identification of potential sustainability models**, including both ‘classic’ and innovative approaches to fund-raising activities, business models, and legal status of the future network of NCMHs.
- **Development of a Network “Business-continuity model” framework** taking into consideration NCMHs diversity and governance, and a particular focus on citizen participation and policy dialogue activities.
- **Develop a roadmap** for the sustainable implementation of an EU network of NCMHs.

WP6 | Communication, Dissemination, Citizens' Engagement & Participation

Led by Karolinska Comprehensive Cancer Centre (KCCC) - joint initiative between the Karolinska University Hospital (KHU, Sweden) and the Karolinska Institute (KI, Sweden) - WP6 will be dedicated to **bringing the Cancer Mission to those who need it the most: citizens**. WP6 will focus on Communication activities across all required levels and, also, targeting non-organized stakeholders - namely citizens, patients and their families, marginalized groups, and the society at large.

TASKS:

Task 6.1 | Dissemination and Communication (AICIB, PT)

Task 6.2 | Citizens' Engagement and Participation Activities (GOEG, AT)

Task 6.3 | Organization of Transnational citizens' engagement events (SIR & KCCC, SE)

THE OBJECTIVE OF WP6 IS TO ESTABLISH COMMUNICATION CHANNELS THAT SUPPORT AND ENHANCE THE MISSION APPROACH :

- **Communication:** Communicate across all required levels to support top-down / bottom-up mission approach.
- **Citizen engagement and participation:** Ensure broad citizen engagement and participation.
- **Dissemination and Awareness Events:** Facilitate 'added European dimension' to national events and effectively disseminate information about local cancer-related events as well as organize cross-cutting events.
- **Impact:** Ensure the long-term impact of the action by establishing a 'roadmap to impact', including but not limited to a self-sustaining hubs ecosystem, tools, and trainings to support NCMHs on the way to get there and the exploitation of results and resources obtained during the project.

ESTABLISHING OF CANCER MISSION HUBS:
NETWORKS AND SYNERGIES

ECHoS CONSORTIUM

ECHoS TOGETHER

Committed to achieving its goals, ECHoS consortium gathers **58 organizations** distributed across **28 countries** covering the entire cancer ecosystem. Partner organizations in the consortium include **Public Health Organisations, Ministries of Science, Ministries of Health, National Funding Agencies, Innovation Centres, Universities, Cancer Centres. Associations, and other organizations from both the public and private sectors.**

Some countries already have operational Cancer Hub-like structures that can contribute to ECHoS with valuable experiences and share prior knowledge sharing in multiple areas. These structures include the Portuguese National Cancer Hub, the Belgium EBCP Mirror Group, the Swedish Vision Zero Cancer initiative, the Strategy Committee of the German National Decade Against Cancer, the Romanian Cancer Mission Informal Group, and the Spanish Core Mirror Group for Cancer Mission just to name a few.

ECHoS will leverage on these national structures and liaise with the established network of National Contact Points for HE and National Focal Points for EU4Health and other appointed delegates to multiple European initiatives towards the creation of competences and know-how to facilitate the creation of competent NCHMs in all MS/AC. In addition, ECHoS will establish key synergies with the CSAs 4.UNCAN.EU, CCI4EU, the Joint Actions JaNe and CraNe, and other key European initiatives (e.g. EUCAIM project), to guarantee Mission on Cancer objectives are implemented in multiple sectors. **Identified synergies, and others that will emerge during the project, will promote an alignment of programmes and strategies decreasing duplication of efforts aiming to defragment and increase the impact of cancer research and health initiatives.** It will also create communication channels between EU initiatives and individual NCMHs, leading to a wider implementation of Cancer Mission-related activities.

Participating countries: Austria, Belgium, Croatia, Cyprus, Czech Republic, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Israel, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and Turkey.

ECHoS EXECUTIVE BOARD

All partners are vested with interest on the successful implementation of Cancer Mission activities in their respective country or region and are experienced professionals in cancer care, cancer research, research- and health-policies and many are involved in health community engagement (e.g., citizens, industry, SMEs, academia, governance, hospitals...). The Executive Board Team is composed of representatives of organizations with leadership roles in the project, both at WP or Task level.

ECHoS STRATEGIC ADVISORY BOARD

The ECHoS Strategic Advisory Board is composed of an external group of multidisciplinary and diverse key opinion leaders to advise on project governance and activities and act in the best interest of the project bridging ECHoS with relevant players in the Cancer area.

Aim

Provide advice on the project objectives and results to ensure that the activities are sound, pertinent and provide high impact to the community.

Providing **valuable insights** on:

- **Strategic direction** of the project
- **Key operational**, technical matters
- **Exploitation and impact** of the projects results

Barbara Radecka

Department of Oncology, Institute of Medical Sciences, University of Opole, Poland; Department of Clinical Oncology, Tadeusz Koszarowski Cancer Center in Opole

Ivana Cattaneo

Executive Director, Therapeutic Area Advocacy and Precision Medicine at Novartis

Jan Geissler

Past chair of WECAN, Founder and CEO of Patvocates

Sarah Stroobants

NCP Advisor for Health & Missions at NCP Flanders / Research Foundation Flanders

Jose M Martin-Moreno

Professor of Preventive Medicine and Public Health at the University of Valencia, Spain and Policy Adviser, European Observatory on Health Systems and Policies

Barbara Radecka

Department of Oncology, Institute of Medical Sciences, University of Opole, Poland;
Department of Clinical Oncology, Tadeusz Koszarowski Cancer Center in Opole

Barbara Radecka is a Clinical Oncologist and assistant professor, Head of the Department of Oncology at the Institute of Medical Sciences, University of Opole (Uniwersytet Opolski) and Tadeusz Koszarowski Cancer Center (Opolskie Centrum Onkologii w Opolu) in Opole. Her main scientific interests are Breast Cancer and Colorectal Cancer.

The topic of her doctoral dissertation is “Long-term results of breast cancer recurrence treatment in patients after primary surgical treatment”, and her habilitation thesis is “Pathomorphological complete response after preoperative chemotherapy in breast cancer patients”.

She is a member of Polish and international research teams and co-author of several papers published in indexed journals. Scholarship holder of the ESMO - European Society for Medical Oncology at the Institut Jules Bordet in Brussels in 2009. She is a member of the Polish Society of Clinical Oncology (Vice-president of the main board) and Polish Oncological Society (member of the peer jury).

Ivana Cattaneo

Executive Director, Therapeutic Area Advocacy and Precision Medicine at Novartis

Ivana is the Executive Director of Therapeutic Area Advocacy and Precision Medicine at Novartis. She has an MSc in International Health Technology Assessment from The University of Sheffield, Faculty of Medicine, Dentistry and Health, a master's in management and a degree in foreign literature from Italian Universities.

She is passionate about Cancer Policy and focuses on policy advocacy on Cancer Research, Cancer challenges, access, and inequalities. Her work experience is at the international level, primarily in life science industry.

Ivana is a member of different steering committees such as:

- Chair of the EFPIA - European Federation of Pharmaceutical Industries and Associations Oncology Platform
- Steering Committee member of ESMO - European Society for Medical Oncology Rare Cancers Europe
- Founding member of Transforming Breast Cancer Together
- Member of the Cancer Grand Challenges Advocacy Panel
- Member of the PROPHET.EU Stakeholder Forum

Jan Geissler

Past chair of WECAN, Founder and
CEO of Patvocates

As a patient living with Chronic Myeloid Leukemia, Jan Geissler co-founded the patient advocacy organisations LeukaNET, CML Advocates Network, Acute Leukemia Advocates Network and the network of pan-European cancer patient organisations (WECAN). He is the founder and CEO of Patvocates, a think tank and social venture on patient involvement and patient advocacy, and founder and managing director of the non-profit European Patient Advocacy Institute (EPAI).

Jan serves as an advisor e.g., on the Patient Advisory Committees of the European Cancer Organisation and the European Hematology Association. He is on the strategy council of the German National Decade Against Cancer and the steering committee of the German National Cancer Plan. Jan is involved in the EU projects HARMONY Alliance and SafePolyMed. He also serves as lay member on the Bavarian Chamber of Physicians Ethics Committee.

Jose M Martin-Moreno

Professor of Preventive Medicine and Public
Health at the University of Valencia, Spain
and Policy Adviser, European Observatory
on Health Systems and Policies

Jose M Martin-Moreno is a Professor of Medicine and Public Health at the University of Valencia, Director of the Medical Education and Quality Unit at the Valencian Clinical Hospital, Director of the Andrija Stampar European Summer School of Public Health and Policy Adviser of the European Observatory on Health Systems and Policies.

Dr. Martin-Moreno is also a Member of the European Academy of Cancer Sciences, Core Faculty Member of the European School of Oncology and of the European Code Against Cancer Scientific Committee, and Member of the ESMO European Policy and Global Policy Committees.

He previously served as Director of Programme Management at WHO Europe and Director-General and Chief Medical Officer of Spain. Additionally, he has also advised the European Commission (through diverse working groups organized under the Directorate General for Health and Consumers, DG SANCO, and the Directorate General of Research, DG Research), the Scientific and Technical Office of the European Parliament, the European Institute of Oncology, and the International Agency for Research on Cancer.

Sarah Stroobants

NCP Advisor for Health & Missions at NCP
Flanders / Research Foundation Flanders

Sarah Stroobants is a National Contact Point Advisor for the Health domain, including the Cancer Mission, at Research Foundation Flanders. In that role, she provides information and advice to potential applicants and beneficiaries of the Horizon Europe programme.

Before joining NCP Flanders, Sarah worked at the European Commission's Department for Education and Culture (DG EAC). At the Commission she was responsible for coordinating the relations between DG EAC and the Council of the EU. She provided policy advice and support to her department on inter-institutional processes, including in the context of the legislative negotiations of the EU programmes managed by DG EAC. Before her time at the Commission, Sarah worked at the University of Leuven's international office as an advisor internationalisation.

PORTUGAL

Agência de Investigação Clínica e Inovação Biomédica (AICIB)

Agency for Clinical Research and Biomedical Innovation

AICIB (<http://www.aicib.pt>) mission is to promote, coordinate, and support activities in the areas of clinical and translational research and biomedical innovation, contributing to the optimisation of Portugal's clinical, scientific, and technological potential. AICIB activities are structured around 3 strategic pillars: i) Foster clinical research and biomedical innovation; ii) Train and create a national clinical research and biomedical innovation network, and; iii) Stimulate the internationalisation of clinical research and biomedical innovation.

CONTRIBUTION

AICIB is the coordinator of ECHoS project. It is our responsibility to ensure that all tasks – including performance reporting - are performed on time, on budget and on scope. At the strategic level, it is our responsibility to ensure that ECHoS work is aligned with the aims of EU Mission on Cancer and with the needs of the European community in health, research and beyond by engaging in multiple interactions and policy dialogues at both organisation and citizen's level. In addition, AICIB leads multiple tasks in different work packages, including communication, and is responsible to harmonise and linking needs and competencies of complementary consortium members.

EXPECTATIONS

The expectations for ECHoS at both European and National levels are quite high. As coordinators our expectation is to be able to support the creation of, at least, 20 new National Cancer Mission Hubs in the next 3 years. But we want more, we want to create a community of researchers, healthcare professionals, and other stakeholders in cancer that interact independently for the creation of innovative solutions - being research projects, new products or services, or the share of experiences and best practice to take maximum benefit from installed competencies.

We expect ECHoS to promote a wider participation of patients and citizens in the entire research continuum (from drafting the idea, to executing, to monitoring and evaluating, and finally to exploitation). We expect that, by the end of ECHoS, more funding agencies, regulatory agencies and other policymakers recognize the importance of engaging multi-stakeholders (citizens and organisations) in both creation and implementation processes. Moreover, we expect this engagement to be aligned with needs and desired impact so that the entire process becomes more efficient thus, sustainable.

In the end, we expect ECHoS to develop a repository of guidelines and tools that can help other organizations to implement relevant, impact-driven, research and policy dialogues in meaningful areas of health and beyond.

BELGIUM

Sciensano
Sciensano

Sciensano (www.sciensano.be) is a research institute and the national public health institute of Belgium. It is the scientific reference in the field of public health in Belgium, experienced in supporting health policy and policymaking through innovative research, analyses, monitoring activities and expert advice. Over 850 of staff members are committed to human and animal health every day, with science and health central to our mission. Sciensano's strength and uniqueness lie within the holistic and multidisciplinary approach to health, with a focus on the close and indissoluble interconnection between human and animal health and their environment (the "One health" concept). By combining different research perspectives within this framework, Sciensano contributes in its unique way to everybody's health. For this, Sciensano builds on the more than 100 years of scientific expertise of the former Veterinary and Agrochemical Research Centre (CODA-CERVA) and the ex-Scientific Institute of Public Health (WIV-ISP).

CONTRIBUTION

Sciensano will be leading WP5 working towards the set-up of a future EU network for National Cancer Mission Hubs (NCMH) and potential sustainability models. An experienced team will lead the work and build on previous experiences in leading EU Projects/initiatives, for example the sustainability and stakeholder engagement, and proof of concept development work packages in CraNE, iPAAC, CanCoN, TEHDAS and InfAct JAs. Sciensano will also lead Task 2.3, contributing to capacity building through the development of a knowledge exchange program. In this task Sciensano will contribute with sharing its experience in setting up the Belgian EBCP Mirror Groups, providing input for the discussion on existing NCMH-like structures that may be used for future NCMH-models.

EXPECTATIONS

Expectations from WP5 in ECHoS include defining and developing an EU network for National Cancer Mission Hubs (NCMH) that will connect transnationally. This will include engaging with relevant stakeholders and experts to ensure their priorities and needs are considered in the process.

Furthermore, complementing the development of the EU network, WP5 will develop a business continuity framework and a strategic roadmap for the sustainable functioning of the EU networks.

Moreover, the Belgian EBCP Mirror Groups concept will be used as a potential model for NCMHs. Sciensano will lead the capacity building and knowledge exchange program which will build on its experience with the Mirror Groups, and provide input and recommendations to guidelines and best practices.

Finally, the expectation that during ECHoS Sciensano will support building a

CROATIA

Klinički Bolnički Centar Sestre milosrdnice (KBC SM) Sestre milosrdnice University Hospital Center

KBC SM was founded in 1846, and it is one of the oldest and largest medical institutions in the Republic of Croatia. It provides expertise in health care, diagnostics, treatment, consulting services, scientific research and education. It has 28 reference centres of the Ministry of Health.

CONTRIBUTION

As University hospital centre we plan to contribute to the activities planned on European level of the ECHOS project, work as National Cancer Mission Hub for Croatia.

EXPECTATIONS

Contribute to the ECHOS long term goals in establishing National Cancer Mission Hubs, meetings and project activities.

Ana Fröbe

Principal Hub coordinator
for Croatia

Željka Rakvin

Secretary

Davor Vagić

Director, Legal Signatory
(LSIGN)

Mia Primorac

Financial Signatory (FSIGN)

Ines Potočnjak

CYPRUS

Cyprus Cancer Research Institute (CCRI)

Cyprus Cancer Research Institute (CCRI) is an independent organisation comprising a coalition of the leading academic, clinical, and diagnostic partners in cancer research; the University of Cyprus (UCY, academic), the Bank of Cyprus Oncology Centre (BoCOC, clinical), and the Karaiskakio Foundation (KF, diagnostics). It is a true interdisciplinary network creating a local, regional, and international lighthouse for dedicated basic & translational cancer research.

CONTRIBUTION

By fostering the creation of a National Cancer Mission Hub, CCRI will implement strategies to increase awareness at a national level and engage relevant stakeholders for establishing new connections and promote their participation in major political and policy dialogues.

EXPECTATIONS

CCRI expects the establishment of transnational collaboration networks for the active engagement of stakeholders and citizens in policy changes.

CZECH REPUBLIC

Fakultní nemocnice Olomouc (FNOL) Olomouc University Hospital

Olomouc University Hospital is one of the largest in-patient hospitals in the Czech Republic. It belongs to a network of university hospitals directly controlled by the Ministry of Health of the Czech Republic.

Olomouc University Hospital is a superior centre in terms of many fields of contemporary medicine. It is also very active in the areas of science research and the education of future health professionals.

CONTRIBUTION

Principal contribution of the site is to provide contact for networking activities in the Czech Republic in the area of cancer epidemiology, diagnostic and therapy guidelines and research.

EXPECTATIONS

The networking between cancer centers in the Czech Republic will be enhanced including the creation of national guidelines and research collaboration resulting in publications in national and international journals.

CZECH REPUBLIC

**Fakultní nemocnice u sv. Anny v Brně (FNUSA)
Mezinárodní centrum klinického výzkumu (ICRC)
St. Anne's University Hospital Brno
International Clinical Research Center**

The International Clinical Research Center at St. Anne's University Hospital is a scientific research institution. We focus on preclinical and clinical research, particularly in the areas of cardiology, neurology and oncology, with the aim of improving patient care.

CONTRIBUTION

The International Clinical Research Center at St. Anne's University Hospital will contribute to the establishment and development of Cancer Mission Hub in Czech Republic in collaboration with the other czech partners in the project.

EXPECTATIONS

We expect to be able to engage in lay presentations and discussions for citizens, as well as national authorities, regulators, industry, patient organizations, and academia in order to raise the awareness of cancer costs in the community. At the same time, we will promote the creation of Czech CMH.

CZECH REPUBLIC

Ústav hematologie a krevní transfuze (UHKT) Institute of Hematology and Blood Transfusion

The Institute of Hematology and Blood Transfusion (IHBT) is an expanding centre offering state-of-art medicine and top-notch research, as well as a friendly and safe organization for both patients and personnel. The IHBT provides cutting-edge diagnosis and treatment of adult patients with severe disorders of hematopoiesis. The research section in cooperation with clinical and transfusion division focuses mainly on the research of hematological tumors, monitoring of gene and protein expression in onco-hematological diseases, research of low molecular weight metabolites in the treatment, study of tumour markers, and the development of new therapeutic protocols including cellular immunotherapy. In addition, the IHBT has a large program devoted to the development, GMP manufacturing and clinical testing of original Advanced Therapy Medicinal Products (ATMPs) based on gene-engineered CAR-T cells. The Institute is also significantly involved in educational and training activities, in cooperation with 1st Medical Faculty, Charles University contributes distinctly to the scientific postgraduate education.

CONTRIBUTION

We are prepared to provide our expertise and more intense activity in 4 aspects: 1. work with the patients' organisations (as hemato-oncology institute we are already active in the field, with very good cooperation with patients and families). 2. precision medicine uses genomic data to provide the right treatment to the right patient at the right time. 3. provide analyses and propose strategies for better availability cellular immunology therapies of hematologic disorders which are being investigated in our institute. 4. we will be also very happy to participate actively in dissemination.

EXPECTATIONS

To continue to develop the IHBT as a top scientific and research centre of hematology and oncohematology. To intensify international collaboration and exchange the experience.

FRANCE

Institut National du Cancer (INCa) French National Cancer Institute

The French National Cancer Institute (INCa) is the government expertise agency responsible for coordinating actions to fight cancer. INCa's ambition is to provide an integrated vision covering all fields of intervention: prevention, screening, care, research and quality of life.

CONTRIBUTION

The Institute is particularly involved in building the blueprint for the future European Network of Cancer Mission Hubs (WP5) and establishing it within the EU Cancer ecosystem (WP4).

EXPECTATIONS

INCa hopes that the future Network of Cancer Mission Hubs will facilitate synergies between the objectives of the EU Cancer Mission and the national level of each Member State. The hubs should facilitate the engagement of all stakeholders in national research and innovation communities and health systems, and organize citizen engagement at local level.

Thomas Dubois

EU Project Lead

GERMANY

DLR-Projektträger (DLR-PT) DLR Project Management Agency

DLR Projektträger offers comprehensive, knowledge-based services related to the management of research, education and innovation. It advises on strategies and programs, manages accompanying dialog processes, and plans and takes over the operational implementation of funding programs. The range of topics include education, equal opportunities, health, society, innovation, technology, environment and sustainability as well as European and international cooperation. In health, DLR-PT mainly works for the Federal Ministry of Research and Education (BMBF) as well as the Ministry of Health (BMG).

CONTRIBUTION

In 2019 the Ministry of Research and Education has launched the so-called “National Decade against Cancer” in Germany (<https://www.dekade-gegen-krebs.de/en>). For the governance, a Steering Committee has been established, composed of all relevant national players in the field of cancer (e.g. patients, policy, research, care, providers, industry, regulation). In addition to its national duties, this Steering Committee will also act as the national cancer mission hub for Germany. DLR-PT has been mandated by BMBF to share the German experiences and provide insights into how to shape National Cancer Mission Hubs in other countries.

EXPECTATIONS

We hope that over the next three years by sharing knowledge and smart planning it will be possible to develop a cohesive European network of National Cancer Mission Hubs with relevant impact for the European Commission’s Cancer Mission as well as for the cancer-related national and regional activities.

Hubert Misslisch

Isabel Aller

GREECE

ETHNIKO KENTRO TEKMIRIOSIS KAI ILEKTRONIKOU PERIECHOMENOU (EKT)

NATIONAL DOCUMENTATION CENTRE

EKT (www.ekt.gr) is a public organization, under the auspices of the Ministry of Digital Governance, with a mission to make scientific knowledge accessible to all, operating as a knowledge hub for stakeholders oriented towards the digital economy and innovation. Having multiple roles, EKT is a) the National Authority of the Hellenic Statistical System for European statistics of Research, Development and Innovation, and b) NCP for Horizon Europe Cluster Health and Cancer Mission. Also, EKT can coordinate R&I on cancer, being a one-stop-shop service provider for SMEs, start-ups, research and innovation teams and organisations. Public and private stakeholders, as well as citizens, will be engaged in collaborative initiatives and policy dialogues on cancer, at national, regional and local level, via the creation of National Cancer Mission Hub.

CONTRIBUTION

EKT is the leading task partner on the implementation of synergies at the operational level with key EU initiatives in the field of cancer. To ensure a seamless implementation of synergies at all (national, regional and local) levels, this task will develop an interactive Toolkit on Synergies. The toolkit will be regularly updated and will include the mapping of all relevant initiatives as well as their research outputs. It will also include a guide on how to translate outputs into actions, training events and material, workshops, knowledge exchange and research programmes, funding opportunities, policy promotion events etc. Synergies should translate into collaborative efforts/activities for the National Mission Cancer Hubs according to their priorities and needs.

EXPECTATIONS

Through the establishment of transnational communication and collaboration networks, the project will enable the alignment of the goals of the Cancer Mission at the national level. Also, it will help bridge potential gaps between citizen (and patient) participation and the formulation and implementation of cancer policy. All involved stakeholders will increase their recognition, and ease penetration in the health sector, alongside increased access to new technologies in order to provide holistic services. Additionally, populations in all EU members states and associated countries will benefit from information sharing and participation in relevant policy dialogues. Wider benefits can also be foreseen for all stakeholders, including the Greek innovation ecosystem through e.g. increased awareness of potential technological breakthroughs and synergies between physicians, policymakers and patients.

HUNGARY

Országos Onkológiai Intézet (OOI) National Institute of Oncology (NIO)

The NIO is the only OEI accredited Comprehensive Cancer Center in Hungary and in the CEE region with 14 clinical and diagnostics, and 6 research departments, 347 beds and a staff of nearly 1,300 focusing on care, research and education. It is the coordinator of the Hungarian Oncology Network, and manages the National Cancer Registry.

CONTRIBUTION

The NIO is a stakeholder in many EU initiatives such as the 4.Uncan.eu (WP6 Leader), CraNE, JANE, eCAN and PCM4EU projects. NIO also contribute to the objectives of WP2, WP4 and WP6 of the ECHO-S.

EXPECTATIONS

The NIO, as the coordinator of the Hungarian Oncology Network is looking forward to contributing to the development of the National Cancer Mission Hubs and to reach the goals of the ECHO-S project in a pan-European manner.

IRELAND

National Cancer Control Programme, Health Service Executive (NCCP, HSE)

The NCCP works with partners in Ireland to prevent cancer, treat cancer, and increase survival and quality of life for those who develop cancer, by converting evidence and knowledge into strategies and actions.

CONTRIBUTION

The NCCP will work with our partners nationally and across Europe to lay the foundations for a Cancer Mission Hub that will be meaningful for the people of Ireland and builds on the expertise of our European colleagues.

EXPECTATIONS

We hope that the next three years will be a collaborative experience to collectively contribute to cancer services in our respective countries and provide a roadmap for greater citizen engagement in cancer policy and service development.

Risteárd Ó Laoide
National Director, National Cancer Control Programme

Donal Brennan
National Clinical Lead for Cancer Research, National Cancer Control Programme and UCD Professor of Gynaecological Oncology, Mater Misericordiae University Hospital

ITALY

Università Cattolica del Sacro Cuore (UCSC)

UNIVERSITÀ
CATTOLICA
del Sacro Cuore

The Università Cattolica del Sacro Cuore (www.unicatt.it), founded in 1921, includes five campuses (Milano, Brescia, Piacenza-Cremona, Roma). The School of Medicine in Rome is at present a world-class training ground for future leaders in medical research and practice, public health and biomedical science.

CONTRIBUTION

UCSC will actively work on Task 4.2 to map and continue synergizing with relevant EU and international initiatives in the field of Cancer and Cancer Research.

EXPECTATIONS

UCSC's objectives within the ECHoS project are to promote synergies between projects and institutions aimed at fighting cancer in Europe. Over the three-year project period, the aim is to identify as many active projects, possible contact-points and synergies in order to optimise efforts in this area.

ITALY

Alleanza Contro Il Cancro (ACC) Alliance Against Cancer

ACC is an Italian oncology research network founded in 2002 by the Ministry of Health. The network includes many comprehensive patient care and research institutes (IRCCS), associations and foundations, and the Italian National Institute of Health, which hosts its offices. The mission of ACC is to bring technological and organizational innovation from basic cancer research to clinical practice, raising and unifying the level of care, treatment, and rehabilitation of cancer patients throughout the country.

CONTRIBUTION

ACC will actively contribute to Task 4.2 - Operational level synergies with EU initiatives - in coordination with UCSC, and will participate in the activities led by INT for Task 2.1 - Definition of general design and operative NCMH structural elements.

EXPECTATIONS

Contributing to shape the identity of National Cancer Mission Hubs and to leverage existing national assets that align with NCMH objectives.

Lidia Villanova
Scientific Project Manager

**Valentina
Trapani**
Scientific Project Manager

ITALY

Fondazione IRCCS Istituto Nazionale dei Tumori (INT) National Tumours Institute, Milan

INT is a public center for treatment and research (IRCCS) and an OEIC-certified Comprehensive Cancer Center since 2015 with activities ranging from cancer diagnosis and care to clinical, basic, translational and epidemiological research. INT is the first Italian center in the Ministry's ranking for healthcare activities and research productivity indicators. In ECHOS INT avails itself of the support of 3 third parties, Fondazione The Bridge, Fondazione Don Gnicchi ONLUS and Fondazione Regionale per la Ricerca Biomedica.

CONTRIBUTION

INT will lead WP2, in particular aimed at (1) mapping of the current European landscape regarding the presence, structure and activity of National Cancer Mission Hubs as well as (2) design a set of minimal criteria to define what is a NCMH: its components, their interactions and the Hub's objectives tailored to the national situation.

EXPECTATIONS

INT's expectations are twofold – we look forward on the one hand to support the definition of policies and guidelines to enhance the impact of the Mission in Europe ; on the other, we hope that the project can help further and strengthen the interaction between the research world and policy actors at the Italian level, improving already-existing Hub-like structures.

LATVIA

Rīgas Austrumu klīniskās universitātes slimnīca (RAKUS) Riga East University Hospital – REUH

Riga East University Hospital (REUH) is the largest emergency multi-profile healthcare institution in Latvia and comprises from 5 clinical centres: Clinical Centre of Emergency Medicine „Gailezers”, Oncology Centre of Latvia, Clinical Centre „Bikernieki”, Latvian Centre of Infectious Diseases, and Centre of Tuberculosis and Lung Diseases.

REUH fields of expertise are microsurgery, plastic and reconstructive surgery, bedsore treatment, toxicology, and sepsis, polytrauma, burn and frost-bite treatment, stem cell transplantation, tuberculosis, HIV/AIDS treatment, and stereotactic radiation therapy for oncology patients.

The oncology care in REUH is provided by all 5 clinical centres according to clinic specialization and cancer type. From all oncological conditions in Latvia approximately 85% of the solitary tumours and 98% of onco-haematology patients are treated at the REUH. REUH provides all types of the cancer treatment – cancer surgery, chemotherapy, and radiation.

There are several specialized clinics in REUH – Oncological Surgery clinic (breast cancer, abdominal surgery, gynaecology, ENT oncology) clinic, Radiation Therapy clinic, Chemotherapy and Haematology clinic. Also, there is Haematology transplantation clinic in REUH, where analogue stem cell transplantations and allogeneic family donor transplantations are performed.

REUH has started an accreditation process for Cancer Centre to become in the nearest future accredited Cancer Centre and after aiming to become Comprehensive Cancer Centre. REUH is also actively establishing cooperation with partners from Estonia, Lithuania, Poland, and Hungary.

CONTRIBUTION

To ensure the successful implementation of the Cancer Mission, Aslimnica will engage in all ECHoS activities to successfully integrate ECHoS activities at Latvian national level in the future.

LATVIA

Rīgas Austrumu klīniskās universitātes slimnīca (RAKUS)

LATVIA

Latvijas Universitāte (LU) The University of Latvia

LATVIJAS
UNIVERSITĀTE

LU has a broad experience in implementation and management of nationally, EU level and internationally funded research projects and well-developed and organized administrative structure for project management and implementation.

The Institute of Clinical and Preventive Medicine of the University of Latvia (LU ICPM) is among the leading research institutes of Latvia to bridge basic medical research to the clinics. The main areas of research include gastrointestinal cancer prevention and screening, infectious diseases, the role of microbiome in health and disease, new technologies and biomarkers for detection, screening, monitoring of various diseases, including cancer and infectious diseases.

The Institute has a long-standing expertise in running biobank, including enrolment of cancer patients, and a relevant group of control. It is the leading chain in clinical medicine within the national node of the BBMRI infrastructure.

LU ICPM has developed broad international collaboration in Europe, Asia, United States and Latin America, East Europe and central Asia. LU ICPM has initiated and currently supporting IARC in realization of the project "Improving cancer care coordination and screening in Latvia and Slovakia". LU ICPM has developed strategic partnerships with multiple clinical institutions and facilities, and is running study subject facilities in these institutions.

CONTRIBUTION

LU ICPM has developed strategic partnerships with multiple clinical institutions and facilities, and is running study subject facilities in these institutions. Riga East University hospital (REUH), being the reference centre for oncology is the main of these strategic partners. About 80% of all the cancer patients are seen in this hospital (Latvia Oncology Centre is a part of this hospital). Our participation in the Consortium would complement the geographical reach in Northern Europe by including one of the leading research institutes in this field in Latvia and our partner - the largest oncology centre in the country. We would contribute to the incorporating points relevant for our country/region.

LITHUANIA

Lietuvos mokslo taryba (LMT) Research council of Lithuania (RCL)

Research
Council of
Lithuania

Research Council of Lithuania (RCL) is a science and studies policy-implementing institution, which performs an expert and advisory function to the Seimas of the Republic of Lithuania and to the Government in matters of studies and experimental development. RCL's mission - is to actively participate in the formulation of research, experimental development, and innovation policy and to strive to make Lithuania's system of research, experimental development and innovation effective and in line with the expectations of Lithuanian society and global challenges, by applying organisational and financial instruments for competitive funding of scientific research. The overarching goal of the RCL is to increase the value, efficiency and impact of science. This is achieved by developing activities along the following main axes: to make science funding more efficient, develop Lithuania's scientific community, implementing the principles of open science, as part of Lithuania's science policy.

NATIONAL NCMH-LIKE STRUCTURE

RCL: perform an expert function, conducting scientific performance evaluations, administers the most important programmes for the development of Lithuanian science, represents Lithuania's interests in science and experimental development issues in working groups of the European Union member states and in many international organisations, implements competitive funding for science programmes.

CONTRIBUTION

Main LMT contribution is in 3 WP Task 3.2 Identify stakeholders and create an interactive tool for stakeholder engagement at MS/AC, regional and local level (M1-M30) and in other tasks where participates all members.

EXPECTATIONS

Active participation in the establishing a network of National Cancer Mission Hubs in national level and in the connection of these hubs transnationally.

LITHUANIA

Lietuvos Sveikatos Mokslu Universitetas (LSMU) Lithuanian University Of Health Sciences

Lithuanian University of Health Sciences (LSMU) is the largest institution of higher education for biomedical sciences in Baltic region and Lithuania also one of the largest universities in Europe specializing in health sciences. With over 30 years of international experience LSMU is successfully combining integrity of teaching, clinical practice and research, competence based education together with multicultural dimension. LSMU's mission is to create, accumulate, systematize, and disseminate scientific knowledge, the latest achievements in research and education, to teach and educate creative, honest, enterprising, educated, healthy, independent, and entrepreneurial personalities, to foster democracy and prosperity, and to nurture a healthy and well-educated society. The exclusive role of LSMU in this educational process is the pursuit of a healthy society, guaranteeing the social and economic progress of the country, the civilisational identity of Lithuania, the creation, fostering and development of cultural traditions of the country and the world. The health and welfare of animals is an integral part of this aspiration.

LSMU studies take place in 81 Departments of Research and Science: 4 Research Institutes, 20 Departments, 48 Clinics, 9 Faculty Institutes. The University community consists of nearly 3,000 employees. LSMU has 2 affiliated medical hospitals: Hospital of LSMU Kauno klinikos (the biggest health facility in Lithuania) and the LSMU Kaunas Hospital. Medical teaching and research are mainly based on cooperation with affiliated medical clinics.

The field of Oncology is one of the most developing directions of the LSMU. The Institute of Oncology conducts scientific research and experimental development activities of strategic importance to the University, delivers courses under the respective study programmes, and trains prospective researchers.

CONTRIBUTION

Lithuanian University of Health Sciences is ready to actively cooperate in the implementation of the "Mission Cancer Hubs" project, by working together with scientific and clinical institutions and ensuring active public involvement. Our main focus will be on creating Advisory Board for knowledge exchange, communication, dissemination and cooperation with the EU and other stakeholders. To ensure the success of the project and public awareness, LSMU will organize awareness events of "Mission Cancer Hubs" in cooperation with patient organizations and the media. Also, we are willing to participate in the development of "Health Policy" and "Health Research Programs". And of course, we certainly do provide technical assistance to researchers and members in the further development of the project.

LITHUANIA

Lietuvos Sveikatos Mokslu Universitetas (LSMU)
Lithuanian University Of Health Sciences

EXPECTATIONS

The project is expected to facilitate the exchange of information and knowledge and best practices between participating countries. will be created a platform for the development and implementation of national cancer strategies. The project will encourage the development of innovative approaches to cancer treatment, such as the use of digital health solutions and the integration of care across multiple services. "Mission hubs" will promote awareness and public involvement in solving cancer problems. As a result, the quality of life, physical and psychological health of patients and their relatives will improve.

LITHUANIA

Lietuvos sveikatos mokslų universiteto ligoninė Kauno klinikos Hospital of Lithuanian University of Health Sciences Kauno klinikos

The Hospital of Lithuanian University of Health Sciences Kauno klinikos is the largest hospital in Lithuania. Established in 1940, Kauno klinikos has grown into one of the most prominent and modern hospitals in the country. The hospital of Kauno klinikos is dedicated to providing the highest quality healthcare to patients from all over the country and abroad. There are many medical "first" and "only" performed in Kauno klinikos which shows a high level of professionalism, qualification, modern medical technologies, and developed infrastructure implemented in the hospital. Kauno klinikos has 39 departments devoted to all medical and surgical specialties. Here the most serious, rare, and undiagnosed diseases are successfully diagnosed and treated, and extremely complex operations are performed.

CONTRIBUTION

Kauno klinikos will especially contribute to ECHoS project in the areas of communication, dissemination, and participation. In order to ensure the success of the project, researchers from Kauno klinikos have been appointed to implement project's objectives by validating project ideas and contributing to knowledge exchange. Main contribution of Kauno klinikos will be in WP1, WP2 and WP6.

EXPECTATIONS

It is expected that the creation of National Cancer Mission Hubs (NCMHs) will provide a space for the exchange of information and knowledge between the different stakeholders involved in cancer care. Additionally, the implementation of the Cancer Mission objectives will promote more resilient and people-centric healthcare and research systems.

Institut National du Cancer (INC) National Cancer Institute

The INC is an association without lucrative purpose. Its activities cover among others the overall organization of oncology, the development of cancer care pathways and guidelines, the promotion of the centres of competence.

CONTRIBUTION

The institute, as beneficiary partner, will have a role in the communication, dissemination, and engagement of the project, as well as in policy maker or regulator, including standardisation body activities.

EXPECTATIONS

INC intend to support the implementation of the Cancer Mission and the integration of activities at national level through engagement of relevant stakeholders (by providing NCMHs with guidelines & best practices).

MALTA

Malta Council for Science and Technology (MCST)

The Malta Council for
Science & Technology

The Malta Council for Science and Technology (MCST), acting for and on behalf of the Foundation for Science and Technology, is a public body established by the central government in 1988 with the mandate of advising government on science and technology policy. MCST champions R&I engagement across public, academic, and private sectors and provides support measures across the research eco-system to help your ideas become a reality. MCST also creates a basis for science education, popularisation, and communication for young students, for the eventual upskilling of the sector and capacity building. MCST manages national funds for R&I through the development and operation of programmes, which in turn, create vehicles for research across the public, academic and private sectors. A portfolio of funding programmes provides researchers with the opportunity to translate their ideas into tangible projects and eventual products or services.

CONTRIBUTION

MCST is the Work Package Leader of WP4 on Synergies: Bridges to other Missions and European Initiatives. In this work Package MCST will champion the dialogues happening in different fora and ensure that the new concept of Cancer Mission Hubs is taken up in such dialogues. Furthermore, MCST is leading a task also in WP4 relating to ensuring a 'cancer-in-all' approach.

EXPECTATIONS

MCST is very happy to be part of this consortium and looks forward to collaborating with the many partners collaborating in this project. We will be working closely with the Ministry for Health (also a partner in the project) to set up a meaningful National Cancer Mission hub to ensure a good outreach of the Cancer Mission among our communities.

MALTA

Ministeru tas-Saħħa Ministry for Health and Active Ageing (MHA)

GOVERNMENT OF MALTA
OFFICE OF THE DEPUTY PRIME MINISTER
MINISTRY FOR HEALTH

The Ministry is one of the Ministries of the Government of Malta and it is responsible for the national health system in Malta.

CONTRIBUTION

The Ministry will contribute through its national perspective as the policy maker and provider of health services to the people residing in the Maltese Islands.

EXPECTATIONS

The influence the design and creation of National Cancer Hubs within ECHoS so that they can be able to include different models that can suit the different contexts of the different Member States within Europe.

Miriam Dalmas

Main coordinator

NETHERLANDS

Integraal Kankercentrum Nederland (IKNL) Netherlands Comprehensive Cancer Organisation

The main goal of the Netherlands Comprehensive Cancer Organisation (IKNL), with the Netherlands Cancer Registry (NCR) as its core activity, is to reduce the impact of cancer, from the personal to the societal level.

CONTRIBUTION

IKNL will participate in almost all work packages. IKNL will facilitate the creation of a 'National Cancer Hub' which will be embedded in our nationwide 'National Cancer Collective'.

EXPECTATIONS

We expect that this collaboration i.e., sharing of information and best-practice will enhance the (trans)national implementation of cancer hubs supporting the European mission on cancer.

NORWAY

Oslo Cancer Cluster (OCC)

Oslo Cancer Cluster is a national non-profit oncology Research & Industry cluster -dedicated to improving the lives of cancer patients by accelerating the development of new cancer diagnostics and treatments. Our portfolio comprises >90 members, covering the entire oncology value chain. Together with The Research Council of Norway and the Norwegian Cancer Society, OCC drives the Cancer Mission Hub Norway, a national initiative supporting the implementation of the EU Mission on Cancer in Norway.

CONTRIBUTION

Thanks to both its experience with multistakeholder engagement in Oncology and its unique ecosystem, OCC will support activities in WP3. It includes promoting the implementation of strategies to efficiently engage organized stakeholders in impactful initiatives against cancer and fostering cooperations across sectors.

EXPECTATIONS

Connect the Norwegian hub to the larger European network, learn from other hubs experience and help to build best practices. Contribute to an EU-wide coordinated effort to promote cancer-policy dialogues in individual countries and in the EU.

POLAND

Narodowy Instytut Onkologii im. Marii Skłodowskiej-Curie Państwowy Instytut Badawczy
Maria Sklodowska-Curie National Research Institute of Oncology (MSCI)

Maria Sklodowska-Curie Institute – Oncology Centre (NIO-PIB) is the biggest comprehensive cancer centre in Poland which provides 741 patient beds and employs 437 doctors. The best oncological staff available in Poland ensures that effective cancer treatment is delivered using highly specialized procedures and therapies.

The Center serves as a modern comprehensive oncological institute, conducting basic research, clinical trials, postgraduate and highly specialized training and provides the most up-to-date diagnostic and therapeutic facilities.

NIO-PIB is responsible for implementing the tasks of the National Cancer Strategy (NCS). The principal intention of the NCS is to reduce mortality in the most frequent cancers, where population interventions could bring about effects in a relatively short (10-year) time period. The activities are to cover five areas that are key to achieving synergies and improving epidemiological indicators in Poland.

CONTRIBUTION

Leader of Task 2.2 and Task 5.2. Expertise in the cancer field coming from the Experts collaborating with the leading comprehensive cancer centre in Poland. Knowledge of conducting basic research, clinical trials, postgraduate and highly specialized training and provides the most up-to-date diagnostic and therapeutic facilities. Cooperation with the Polish Ministry of Health and the Ministry of Science. Integration of the NCMH to the National Cancer Strategy in Poland.

EXPECTATIONS

Creating Polish Cancer Mission Hub and promoting the creation of NCMH in the country on regional and local levels, as well as being an active partner in the European Cancer Mission Network.

Increase awareness and engagement of relevant stakeholders in the country in policy dialogues on Cancer as well as across Europe.

To establish a network of support to advance Cancer Mission across Europe.

To create the foundations for NCMHs by formulating recommendations on governance, business models, legal status, strategic positioning, and communication of Cancer Mission objectives across all the societies.

Coordination of all actions undertaken within Europe Beatings Cancer Plan.

PORTUGAL

Direção-Geral da Saúde - Ministério da Saúde (DGS-MS) General Directorate of Health Ministry Of Health

Programa Nacional
para as Doenças Oncológicas

DGS (<http://www.aicib.pt>) is a central service of the Ministry of Health of Portugal, integrated into the direct administration of the State, endowed with administrative autonomy. The DGS exercises its activity centred on the interests of citizens, in articulation and cooperation with other services and bodies, in particular those dependent on the Ministry of Health.

CONTRIBUTION

As an associated partner to ECHoS, DGS/MS will contribute with the perspective of a national health authority to the ECHoS project. DGS/MS will also support the dissemination of ECHoS and ECHoS' results in the national health community by engaging ECHoS partners in relevant meetings.

EXPECTATIONS

Expectations of DGS/MS towards ECHoS project are focused in the capacity to align European and National Policies in Health and related areas. Reducing the gap between European and National policies and actions, in health in general, is essential to secure a more robust and resilient Europe, prepared to face future challenges in health. The rise in the number of cancer cases in Europe is frightening, only coordinated actions between all countries, with high coordination between relevant stakeholders and community in general, will enable fighting cancer by reducing inequalities in literacy, access to diagnostic and treatment and quality of life of survivors. This is also a unique opportunity to align actions and strategies between EU framework Programmes of Health and of Research. It is fundamental to coordinate investments on research towards health needs, and investment on health towards research results, to guarantee a better use of resources and knowledge.

tecnalia

MEMBER OF BASQUE RESEARCH
& TECHNOLOGY ALLIANCE

TECNALIA is the largest center of applied research and technological development in Spain, a benchmark in Europe and a member of the Basque Research and Technology Alliance. We collaborate with companies and institutions to improve their competitiveness, people's quality of life and achieve sustainable growth. We do it thanks to people who are passionate about technology and committed to building a better society.

- Our Mission: To transform technological research into prosperity.
- Our Vision: To be agents of transformation of companies and society for their adaptation to the challenges of a changing future.

We work with an increasingly strategic business relationship model based on trust, collaboration, and a shared technological approach. Some of our data; 115 m€ income, 1472 people in staff, 752 active patents, 20 active start ups. In the Health division we work closely with academic and clinical partners. we transfer our knowledge to biomedical sector industry. Our cancer research covers basic and applied research focused in the development of platforms for precision diagnosis and treatments.

We are the first private Spanish organisation in contracting, participation, and leadership in the European Commission's Horizon 2020 programme and we are ranked third in European patent applications.

CONTRIBUTION

TECNALIA will participate in the Knowledge Exchange Program providing the expertise from the Spanish National Mirror Group on Cancer. This activity will enable the sharing of good practices and experience from the Spanish cancer hub in the process of designing the NCMH structure. We'll contribute to the active engagement of stakeholders, fostering cooperation.

EXPECTATIONS

TECNALIA expects to become a reference stakeholder in the future EU network of National Cancer Mission HUBs. Our present expertise is focus in cancer research in diagnosis and treatment where we have a strong research network. This project will allow us to increase our present EU research network, but we are mainly interested in creating an EU network with stakeholders from cancer public health and cancer associations to work in strategic areas well aligned with the EU Cancer Mission.

Karolinska Universitetssjukhuset, Region Stockholm (KUH, RS) Karolinska University Hospital, Stockholm Region

Karolinska
Institutet

KAROLINSKA
UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Karolinska Comprehensive Cancer Centre brings together cutting-edge expertise in basic research, clinical research, and highly specialized cancer care. The centre is a joint initiative within Karolinska University Hospital and Karolinska Institutet. Karolinska Comprehensive Cancer Centre is the first Comprehensive Cancer Centre in Sweden to be accredited according to the Organization of European Cancer Institutes (OECI), a non-governmental, non-profit legal entity established in 1979 to promote greater collaboration between European cancer centre and institutes. The accreditation is a confirmation that the organizations meet the high-quality requirements that the OECI places on care, research, and education in the field of cancer. Karolinska University Hospital is one of Europe's leading university hospitals with a special responsibility for highly specialized care. Karolinska Institutet is one of Europe's highest-ranked medical universities. Together, we constitute a medical centre that conducts world-leading healthcare, research, and education. We have a significant role in the development of health care where new research findings and new treatment methods are continuously implemented to benefit the patients.

CONTRIBUTION

Karolinska CCC is dedicated towards systematically cooperate and partner with patients, to increase the involvement of patients in the development of care, research, and education in the field of cancer contributing for ECHoS with accumulated years of expertise in patient engagement and participation activities in cancer. Karolinska CCC brings a strong pool of knowledge and competences to enable the general and specific objectives for ECHoS in the creation and development of NCMHs capable of implementing Cancer Mission at national, regional, and local level. Through already established national and international networks, Karolinska CCC and Vision Zero Cancer with its pentahelix structure, have the ability and good conditions to lead a national hub for coordination and implementation of the Cancer Mission in Sweden and Europe.

EXPECTATIONS

A national Cancer Mission hub will be established in each Member State and a network will be formed between countries to support the implementation of the EU Cancer Mission. Activities will include awareness raising and coordination of the Cancer Mission between relevant actors in national, regional and local research and innovation and health systems, while creating and exploiting synergies with the EU Beating Cancer plan. This aims to promote an enhanced policy dialogue on cancer control at national, regional and local level.

Stiftelsen Stockholm School of Economics Institute for Research (SIR), coordinator of the Vinnova-funded innovation milieus VISION ZERO CANCER and TESTBED SWEDEN PRECISION HEALTH CANCER
Stockholm School of Economics Institute for Research
Vision Zero Cancer

Vision Zero Cancer (Nollvision Cancer) and its flagship initiative Testbed Sweden for Clinical Trials and the Implementation of Precision Health in Cancer is a mission-oriented innovation ecosystem financed by Vinnova, Sweden's innovation agency and coordinated by SIR, Stockholm School of Economics Institute for Research. Launched in November 2019, Vision Zero Cancer's objective is to 'provide a national contact point for system innovation that contributes to reduce the incidence of cancer and to transform cancer from a life-threatening into a treatable or chronic disease in Sweden and globally'.

Core partners: Karolinska Comprehensive Cancer Centre, Swedish Association of Local Authorities and Regions, Stockholm School of Economics, AstraZeneca, Elekta, Roche.

The Stockholm School of Economics Institute for Research (SIR) is a Swedish national research institute with the overall aim to contribute to the advancement of the economic sciences through basic, as well as applied, research within a wider social science context. This research is carried out for the general benefit of the business community and society at large, and is to be conducted independent of political, religious, financial and other special interests.

CONTRIBUTION

Vision Zero Cancer will contribute national and international networks, insights, methodology and hands-on experience in building, implementing and scaling a cancer mission-oriented innovation ecosystem. Vision Zero Cancer brings together stakeholders from the healthcare system, academia, industry, and civil society in the mission to beat cancer. The ambition is to deliver impact by putting research and innovation into a new role, combined with new forms of governance and collaboration.

Zero Cancer requires effective action across the full spectrum of prevention, early detection, treatment, survivorship and quality of life. We are therefore building a portfolio of different activities and projects with the ultimate goal to effectively cover the full spectrum; we currently develop methodology to ensure a systematic approach by combining opportunistic choices within the deliberate addressing of gaps and by formulating 'roads to impact'. We are working towards a future where healthcare is ever more human-centred, with patients being involved in research as an option within the healthcare ecosystem.

SWEDEN

Regionala cancercentrum i samverkan (RCC) Confederation of regional cancer centres

The regional cancer centres (RCC) in Sweden support the nation's 21 county councils in increasing the quality of cancer care and improving outcomes, as well as maximising the efficiency of the use of health care resources throughout the patient pathways. RCC has a supportive, stimulating and coordinating role to develop cancer care according to the intentions of the national cancer strategy and Europe's Beating Cancer Plan. The mission is to meet the challenges and demands of tomorrow's cancer care through outreach and collaboration. RCC has developed systems and programmes to facilitate local, regional, and national collaboration.

CONTRIBUTION

Regional Cancer Centres' (RCC) mission is to meet challenges and demands in tomorrow's cancer care through outreach and collaborative work. The RCC has developed structures for local, regional, and national collaborations both with patients and professionals and can serve as a model for other countries how to build an infrastructure for cancer care.

EXPECTATIONS

Agree on a common definition of what a cancer mission hub is and how it relates to other network structures such as cancer comprehensive infrastructures. Establishment of a European network for cooperation and exchange of experience.

TURKEY

Türkiye Sağlık Enstitüleri Başkanlığı (TÜSEB) Health Institute Of Türkiye

TÜSEB (<https://www.tuseb.gov.tr/en>), the Health Institute of Türkiye, is a related entity of the Ministry of Health with a mission to lead R&D in the field of health science and technologies, and to support the practitioners and researchers scientifically, technically and financially, to increase domestication and nationalisation in a way that fulfil the needs of individuals in Turkey in line with developing technologies. As one of the institutes of TÜSEB, Türkiye Cancer Institute is the umbrella organization for the establishment of cancer mission hubs. Our main tasks are (i) to develop strategies to beat cancer and therefore supports national and international R&D activity, (ii) to fight against cancer by working in collaboration with national and international initiatives, academia, health sector and private sector in life sciences and medicine, (iii) to conduct and support research on the development of novel cancer therapeutics and efficient cancer detection methods, (iv) to create scientific support and establishment of coordination mechanisms for Clinical Research,(v) to lead creation and standardization of national cancer treatment guidelines. Türkiye Cancer Institute is the authorized institution to establish and coordinate the National Cancer Hubs to promote the implementation of EU Cancer Mission and European Beating Cancer Plan objectives in Türkiye.

CONTRIBUTION

TUSEB, along with the other participants, will provide information about the diversity of national contexts and extract best practices for the development of the manual with general recommendations and guidelines for implementing National Cancer Mission Hubs (NCMHs) in each MS/AC. TUSEB may also participate in the validation of the draft manual and in the design of the final version of the NCMH.

Additionally, TUSEB is expected to develop a bespoke implementation plan for the creation or maturation of NCMHs in Turkey based on the produced guidelines and recommendations, and present it as a roadmap defining short-, medium-, and long-term goals and milestones for the implementation of NCMHs in their country/region.

EXPECTATIONS

Implement and refine NCMHs according to their bespoke implementation plans.
Assessing effectiveness of guidelines and identifying areas for improvement.
Making sure the long-term sustainability of NCMHs.
